Circupool rj45 plus salt chlorine generator

Your Salt Pool System Experts Low prices + Fast Shipping on top [categoryname]Pool EquipmentChlorine GeneratorsSalt CellsOzone GeneratorsSalt SystemsPool [categoryname][categoryname] Parts Have questions? Don't hesitate, contact us! Adding A Saltwater Pool System Salt pool conversion just means adding a saltwater chlorinator. Using basic tools, this can usually be done in about an hour. Have an existing system? Convert from anther brand in just minutes using available adapter kits! Unlike other brands, CircuPool never penalizes your warranty for self-installation. Choose Your System (How do I know what I need for my pool?) User reviews Why Pool Owners Choose CircuPool I bought a Rj45 circupool chlorinator in 2008. It paid for itself in the first year with what I was paying for chemicals with Baquacil the prior year. I am replacing my system this year with a Rj45 plus. I wouldn't consider any other company considering the technical help and the no hassle warranty. Great company to deal with. Verified Buyer Products made by CircuPool are of the highest quality and functionality that can be found in the swimming pool equipment business. They are easy to install, work flawlessly, have long life and to top that off, they look like they were not only engineered well, but they have great design elements and look good, too. Couple all of that with stellar customer service and you have an absolute must have source of high parts with long duty life. In all of the reviews I have ever written, I have never given any company or its products such a high rating. CircuPool has earned it. Verified Buyer I just wanted to let you know that the Circupool system that I ordered back in April has been working really well over the summer. This was the first summer since we bought the house 2 years ago that we've had no problems keeping our pool well chlorinated and clear, it's been great! I can close the pool next week knowing that the water is as well balanced as it can be. Many thanks. Verified Buyer I received the saltwater pool chlorinator on Tuesday, installed it on Wednesday, started it up on Thursday and swam on Friday in the cleanest clearest softest water ever in my pool. Thanks for your help in making this a very pleasant experience. Should have done this several years ago. Ernie Verified Buyer This system has been in place for two months and I haven't had to touch anything...nothing... zero... The circupool Rj60 is better than anything I expected Thank You... Verified Buyer We feel we got a great price on the salt system we purchased. My husband had a question about the install and called customer support, he was very impressed with how fast they answered his call. Also with the friendly service he received. The salt system so far is running great. Thanks Verified Buyer This is an excellent company and service, the products offered are by far the least expensive of the other suppliers. This company always have the answers to my questions when they arise with the operation and troubleshooting of my equipment. Jason on the tech department is always very personable and willing to help and go through the troubleshooting steps to find and alleviate the problem...great job guys, great job Verified Buyer Everything a swimming pool should be™ from \$549 - shop now Join the millions of pool owners that have discovered the benefits of modern salt systems. Swimming pool owners choose CircuPool because they know it's matchless for value, warranty, ease of installation, and support. What System Is Best For Your Area? Features The CircuPool Difference CircuPool.com is the number one site for information about modern saltwater pools. Learn the facts and the myths about these incredible systems and find out if one is right for you. Whether your pool is new or old, a CircuPool® System will save you money, eliminate the hassle of pool care, and make your swimming a true pleasure. CircuPool's products are crafted to exacting standards and carry the best warranty in the business...your complete satisfaction is guaranteed. Page 2 Hello from Mesa Arizona! I don't do chemistry Soooo, I'm thinking of switching over to the Circupool Rj45-Plus. I figured this would be the best place for 100% honest reviews. Each summer I battle red/brown algae. Full disclosure, my husband always forgets to check and do the chemicals I'm tired of buying and storing them as well. Any helpful advice and/or opinions would be greatly appreciated Thanks in advance! Welcome to the forum! :handshake: Forum members have reported good luck with the Circupool Rj series SWCG's. You will still need to do chemistry. Testing your pH and FC often (daily to start) and TA weekly and CH and CYA monthly is recommended, even with a SWCG. Adding acid will need to be every few days or so to maintain your pH. I suggest you read Pool School - ABCs of Pool Water Chemistry and consider reviewing the entire Trouble Free Pool School book. You may also want to get the Pool Math app. K. Welcome to TFP... a great place to learn how simple pool chemistry, and forgetful husbands, can be.... What is that wrapped around your railing, and what is it for??? If you don't do some chemistry, you can't really expect to be successful at operating your pool. With the proper test kit and help from this site, even I can do it, so I'm sure you can too.. A SWCG, will certainly help make your work easier, but it will not eliminate the need to run tests and balance the water. You should check out our pool school... See this link.. Pool School - Pool School As long as the SWCG is at least 2 x the volume of your pool, the Rj series units will work just fine. Thanks for posting, Jim R. There are many things to love about converting your pool to salt water. Not only is it gentler on your skin and eyes, but it can also help relieve aches and pains in joints and muscles.But what exactly is a salt water chlorination system, and how does it work?Today we're going to be taking an in-depth look at the CircuPool Rj45 chlorination system to see its features, and their benefits. But first, lets quickly go over how it works.How does the circupool rj45 work?The Rj45 uses a process know as electrolysis, which creates chlorine through the salt molecules in the water in order to sanitise your pool. A small electric charge is applied across a set of titanium plates inside the Electrolytic Cell and in return produces Sodium Hypochlorite (NaOCl).In water, Sodium Hypochlorite dissociates into sodium (NA+) and hypochlorite (OCl-) ions. It is the hypochlorite ions that form with the hydrogen (H+) ions (from the water) to form hypochlorous acid (HOCl), which is the active agent that destroys bacteria and algae, and oxidizes organic matter. This form of chlorine works quickly in the pipe, leaving only a mild residual in the pool.Circupool Rj45 Plus quick reviewThe CircuPool Rj-45 Plus is one of CircuPool's most popular saltwater chlorine systems. The Rj45 features a modern well constructed design, and can be used in pools up to 45,000 gallons in volume.In full production the CircuPool Rj45 is able to produce up to 2lbs of chlorine a day, which is equivalent to nearly 2 gallons of liquid chlorine! The Rj45 features a clear cell which allows you check to see if there is any calcium buildup on the titanium cell plate, and it also gives you the ability to see the chlorine being produced.The CircuPool Rj45's cell has an average life span of a whopping 15,000 hours, unlike the CircuPool CORE Series which is expected to last around 10,000 hours. A replacement cell will cost around \$690.00.The Rj-45 features an easy to use OLED display which allows you to alter chlorine output, activate boost mode, and notifies you when the salt cell needs to be replaced. This display also shows your pools salt levels, and will indicate if your pools salt content is too low, or too high. The display module is protected by a clear, weatherproof protective cover.The CircuPool Rj45 is easy to set up and install, and does not require installation by a trained professional in order to keep the warranty. The Rj-45 will also replace Hayward Aqua Rite systems without cutting or gluing, making it a snap to upgrade your salt pool system!If you want to prolong the life of your salt cell it is recommend that you purchase a CircuPool salt system that is designed for double your pools water capacity. This will allow you to operate your system at 50% power, which in return will put less stress on your salt cell.CircuPool Rj-45 specsChlorine output: 2lbs/dayManufactures warranty: 7 yearsWater capacity: 45,000 gallonsReplacement cell cost: \$690.00Salinity range: 3000-4500 ppmSalinity test: Yes - High, Low, Displays ppmFlow sensor: Yes, Independent Flow SwitchSelf Cleaning: Yes, Reverse PolarityBoost mode: Yes - 24hrsWinter mode: YesCircuPool Rj45 chlorine generator user reviewsWhile checking out reviews for the CircuPool Rj45 it was clear to see there was large amount of happy users. Many people loved how simple it was to install saying "the manual was easy to follow, and the customer service was great and easy to contact".Other users mentioned how perfectly the Rj45 operates saying "The water quality in my pool is outstanding, crystal clear, algae free, and silky smooth. I have always self maintained my pool using chlorine, this change to a salt system has been an absolute pleasure, no more chlorine, no shocking. The water is always crystal clear, algae free and no more irritated eyes! Water feels much nicer on your skin, no chlorine odours and more time for me to enjoy the pool!"People also liked the fact that the salt cell was clear, allowing them to see inside it to check if it needs cleaned. However one user did mention that their salt cell did need to be cleaned nearly 2x more regularly than what was expected.CircuPool Rj-45 summaryThe CircuPool Rj45 is definitely a salt water generator I would recommend to anyone looking at upgrading or changing their pool to saltwater. It is easy to install, being able to perfectly replace existing Hayward Aqua Rite systems, making it a great choice for any pool owner.It is a well designed product made out of quality materials that requires minimal maintenance, making it great value for money.I like the fact that it is easy operate, and how you are able to monitor chlorine output through the control panel, allowing you to choose the optimal levels, which in return gives you the best possible water quality.I also really liked the fact that it comes with a 7 year warranty, and that the salt cells have a life span of 15,000 hours.It is for these reasons that I think that the CircuPool Rj45 is definitely a saltwater generator to consider.Click here to get one for yourself today.Or feel free to check out our reviews on other great CircuPool saltwater generators like the CircuPool Core35, or the CircuPool Core55.
